The Holme C of E Primary School

Weekly Newsletter Issue 39 23rd July 2021

Dear Parents and Carers,

Happy Holidays!

I can't quite believe we have made it to the end of term! I'd like to start by saying a huge thank you everyone for this past year. It has been full of ups and downs, but despite everything you have made my first year at The Holme absolutely amazing and I thank you for letting me be part of your family. Your children are gorgeous and I am proud of each and every one of them!

It has been quite an emotional day today saying goodbye to our Year 6 children as well as Mr Coutts, Miss Knights, Mr Love and Miss Kaur. We are very sad to see them go but wish them well on their new adventures!

I have been asked by Robin, one of our LGC members to let you know of an opportunity of tennis coaching for the under 8's and the under 10's at Headley Tennis Club. The sessions are run on Saturdays between 1.00pm and 2.00pm for the under 8's and between 2.00pm and 3.00pm for the under 10's. The cost is £7.00 per session. If you are interested, please contact Liam Vacher on 07759139863 or email coaching@headleytennis.com

I will send out another newsletter towards the end of the holidays with reminders, however in the meantime as I said last week we are staying largely in line with what happens now timings wise, ie gates open at 8.25, into class at 8.30am and registers close at 8.40. At the end of the day we will all finish at 3.05pm.

A couple of other bits and pieces ahead of September... We would like to the children to continue coming into school in their PE kits on PE days, however we will expect all children to look smart in their correct PE kit! (white or house colour t-shirt, black shorts or jogging bottoms and plain black sweatshirt with). I know ASDA and Tesco sell plain black school sweatshirts and we intend looking into perhaps having a school logo PE kit which will be exciting. Whilst on the subject of school uniform, please can I remind you that high expectations around smartness, school shoes and correct uniform will also be in place for September!

Finally I would like to take this opportunity to wish you a restful and enjoyable summer break and I look forward to seeing you all back safely in September!

Thank you again for all your support and have a lovely break.

Sarah Stevenson

Headteacher

HAMPSHIRE SCHOOL NURSING KEEPING SAFE SUMMER NEWSLETTER: FOR PARENTS OF PRIMARY-AGED CHILDREN

How to access healthcare for sick children and keeping your child safe throughout the summer holidays

News:

NHS England has issued warnings that there has been a surge in respiratory syncytial viral (RSV) infections in children, it is the most common cause of bronchiolitis in children and babies. Most RSV causes a mild respiratory illness, but for a small number, this can lead to severe respiratory disease. Please click the link for further information.

Keeping safe whilst at home

Safe from accidents
parents pack:
[cswparentpack.pdf](#)

- **Burns and Scalds** – Keep hot things out of reach such as hot drinks and hair straighteners.
- **Poisoning** – primary aged children may already know what they can safely eat but they are still at risk of accidental poisoning as they are more likely able to open child-resistant tops. They also may easily be confused by medicines that are colourful and look like sweets. **Keep them locked away safely in the original container, the same should be done for any cleaning products.**
- **Button Batteries** – powerful lithium coin cell batteries can badly hurt or kill a child if they swallow one or it gets stuck in their food pipe as the battery reacts with the saliva to create caustic soda, leading to internal bleeding. Click on the booklet “Button batteries be aware” for further information.
- **Garden safety:**
 - **Trampolines** – As a rule only allow one person on a trampoline at a time as the majority of accidents happen when two or more people are on it, also ensure that a safety net is in place.
 - **Plants** - Garden plants can be confusing, teach your child not to eat anything they pick outside without checking with an adult first as poisonous berries can look similar to ones that they can eat.
 - **Gardening equipment** – Never leave electrical equipment plugged in when not in use and lock away tools in a shed or secure area. Keep all weed killer, fertiliser antifreeze, and screen wash in the original container and locked away.
 - **BBQ's** – They should never be used in enclosed spaces as all BBQ's produce carbon monoxide which is deadly, they can also take hours to cool down after use and can cause serious burns.
 - **Water** – Drowning can occur in as little as 5cm of water, remember to supervise children around ponds, and paddling pools/pools/hot tubs. Children can also wander off into neighbouring gardens and access their pools etc.

Keeping safe whilst out and about

We are all making the most of the COVID restrictions lifting and being able to get out with our families. Here are some tips and information to help keep you safe.

Pedestrian safety – teach your children how to cross the road safely, you can practice together using the green cross code. <https://www.roadwise.co.uk/schools/using-the-road/green-cross-code/> Children will copy what you do, so demonstrating how to do it safely will help children get into good habits. With older children, you can help them to learn how to assess risk, judge speed and understand consequences especially when they are getting ready for walking to school without you.

Cycling – Lead by example and get your child into the habit of wearing a helmet. [Cycle Safety – THINK!](#)

Driving – Keep an eye on your speed while driving, a child is 3.5 times more likely to die if they are hit by a car driving 30 – 40 mph. [Advice for road users – THINK!](#)

Tick bites – Ticks are small spider-like creatures that are found in areas with long grass, they attach themselves to the skin and feed off human/animal blood. Ticks can sometimes transmit microbes that can cause diseases such as Lyme disease. If you have been bitten by a tick remove it as soon as possible using fine-tipped tweezers or a tick removal tool. Click on the link for more information and a video on how to remove a tick. <https://what0-18.nhs.uk/parentscarers/worried-your-child-unwell/tick-bites>

Sun Safety – Take extra care to protect children in the sun as their skin is more sensitive, damage caused by repeated unprotected exposure to the sun could lead to skin cancer in later life. Keep children in the shade. Protect their eyes from the sun with a pair of wraparound sunglasses and a sun hat to keep the sun off their head. Avoid being out in the hottest part of the day which is 11:00 – 15:00. Ensure that children are well hydrated and drink more when it's hot. High factor sunscreen should be applied regularly at least 2 hourly and more so if they are in and out of the pool. Keep blinds and curtains closed during the day to keep their bedrooms cool, keep layers of nightclothes and bedclothes to a minimum. Further information can be found using the link below.

<https://www.healthforkids.co.uk/grownups/healthy-bodies/your-guide-staying-safe-sun/> Take a look at the health for kids website created especially for children to learn about staying healthy. With a separate section for parents. <https://www.healthforkids.co.uk/>
